

JOB DESCRIPTION

Engineer – GIS
Bengaluru
Services & Solutions

SKYLARK DRONES

April 2025

careers@skylarkdrones.com

ABOUT US

Skylark Drones is a technology company building the core infrastructure for the global drone ecosystem. We are backed by institutional VCs like InfoEdge, Indian Angel Network, AdvantEdge, etc.

The company innovates and integrates drone solutions and services into scalable real-world applications that benefit enterprises and the community while ensuring authenticity and clarity are central to making decisions that save time, money and lives. Today, our platform empowers Fortune 500 companies with drone analytics, service providers and independent enterprise drone pilots with secure execution of flights and manufacturers with regulatory airspace compliance.

There has never been a more rewarding time to be a Skylark employee. Our brand is a direct reflection of what we have accomplished, where we are today and our vision for the future. It reflects our uncompromising determination for excellence and focus on connecting our employees, clients and other stakeholders to deliver complex and sustainable projects, paving the way for a future where society can thrive.

JOB REQUISITES

Role Summary

As an Engineer – GIS, you will assist in executing GIS projects and contribute to geospatial data analysis and drone survey outputs. Working under the guidance of senior team members, you will support the integration of the latest GIS technologies and methodologies while gaining hands-on experience in drone data processing and GIS tools.

This position is ideal for candidates with a foundational understanding of GIS who are eager to grow their expertise in a fast-paced, innovative environment.

Responsibilities

Core Functions

1. Assist in the photogrammetric processing of UAV data sets and geospatial analysis tasks.
2. Support senior engineers in developing and implementing workflows to improve project efficiency.
3. Contribute to the digitisation and analysis of assets within various GIS platforms.
4. Collaborate with team members to integrate new GIS technologies into existing processes.
5. Participate in client engagements to understand project requirements and assist in delivering outputs.

Key Competencies/Skills

Mandatory Skills

1. Basic knowledge of GIS software such as QGIS, ArcGIS, or similar platforms.
2. Understanding of photogrammetry and remote sensing concepts.
3. Strong communication and collaboration skills.
4. Ability to work independently and within a team.
5. Eagerness to learn and adapt to new technologies.

Desired Skills

1. Familiarity with UAV operations and drone technologies.
2. Exposure to large-scale GIS projects or enterprise-level clients.
3. Knowledge of ISO 27001:2022 standards is a plus.

Qualifications

1. Master's degree in Remote Sensing, GIS, Civil Engineering, Geoinformatics, or a related field.
2. 0-2 years of experience in GIS and remote sensing.

OUR GUIDING PRINCIPLES

We value our people and our reputation.

At the heart of our performance are our people. Every member of our team has a voice and plays their part in contributing to our successes on and off the field. We take pride in creating an innovative, collaborative and high-performance culture where all of our team members are respected, empowered and valued. We are humble and act with moral and intellectual integrity, keep our word, treat everyone with respect, support our colleagues, and embrace diversity. We care about individuals and their progress and offer our professionals the most fulfilling career development. We promote our young recruits because we believe fresh perspectives bring great ideas and new energy.

We are future-focused and challenge the status quo.

In a world where variability is the only true constant, those who dare to look ahead and question the way things are done hold the key to progress. By challenging the status quo, we open doors to innovation, creativity, and growth. Embracing the future with a fearless spirit allows us to shape a better tomorrow, where possibilities are limitless and change is our ally, not our foe.

We foster collaboration in everything we do.

At the heart of our endeavours lies the belief that collaboration is the cornerstone of progress. We understand that by working together, we tap into the collective wisdom, talents, and strengths of all involved. Through collaboration, we build bridges, break down barriers, and cultivate a rich tapestry of ideas that ultimately propel us forward. Together, we achieve more than we ever could alone, creating a legacy of shared accomplishments that stand the test of time.

We have an empowering culture and hold ourselves accountable.

Our empowering culture is the foundation upon which we build greatness. We empower our team members, colleagues, and partners to reach their full potential, recognising that their individual growth is intertwined with our collective success. We take responsibility for our actions and their consequences, ensuring that our commitments are not just words but unwavering principles. Through empowerment and accountability, we forge a path towards excellence and create a legacy of integrity and achievement.

We are continuously working to make our team even more diverse and inclusive. Whatever your background, we believe you will find working with us rewarding and enriching!
